CRAIGIEBURN SECONDARY COLLEGE

At Craigieburn Secondary College we have high expectations of our students, teachers, parents, curriculum programs and the broader community. Students and staff strive to "be their best" in all aspects of College life.

Our focus is to ensure that every student engages with their learning and is challenged to achieve beyond their potential.

Our teaching code of practice is underpinned by a rigorous instructional framework that ensures that there is consistency in the delivery of high level educational programs.

We believe that when there is an environment of excellence in every classroom then students will achieve their full potential.
